

DISTINCTION

THE CLOTHING OF
NO REGRETS

For Years

Campbell's Clothinghas been made for all occasions
and for the most fastidious people.The distinction that results from
this long experience and from the
careful craftsmanship that has al-
ways been maintained, is apparent
whenever you pick up any gar-
ment bearing our label.Whether you desire your Suit or
Overcoat ready for service on
short notice or made to measure
from cloth of your own selection,
we can please you.**WM. McLAUGHLIN** Regd.

21 McGill College Avenue Montreal

A MCGILL BATTERY IS POSSIBLE

ERIC A. CUSHING

Member of Science '17 Running for the
Presidency of the Students'
Society.Eric A. Cushing, Sci. '17, who has
been nominated for the Presidency of
the Students' Society, is known equal-
ly well as an experienced student
leader and as a successful athlete. Born
in Montreal on November 17, 1893,
he attended the Montreal High School
before entering McGill with the class
of Arts '14. Through illness, Mr.
Cushing was unable to complete his
course in Arts with '14, and instead
finished with '15. He is now a mem-
ber of the class of Science '17 and
President of the Junior year of the
University.Mr. Cushing entered the Students'
Council in 1914 as President of the
Track Club and last year was again
returned to that body, as President of
the Athletic Association. As such, he
has had a great deal to do with the
problems arising through the conduct
of interclass and interfaculty competi-
tion in athletics this year. He is at
present Vice-President of the Students'
Council.An active member of the Track
Club since 1912, Mr. Cushing has up-
on many occasions represented the
University in field events. He is best
known as a pole vaulter and in 1913
set up the University record of 10
feet, 8 inches in this event, a record
which still stands. In 1913-14 he won
the individual indoor and outdoor
track championship of the University
and has also won the First and Sec-
ond year medals in the Wicksteed
Competition. He is taking a course
in Chemical Engineering.

M. SUTHERLAND DIES OF WOUNDS

Was a Member of the Class of
Arts '15 for Three Years.

A PROMINENT STUDENT.

Thirty-Nine Names on Casualty
List Issued at Ottawa
Last Night.Ottawa, March 13.—The name of
Corporal Murray Campbell Suther-
land, a member of the class of Arts
'15 at McGill for three years, and pro-
minent in undergraduate life at the
University, is included in the list of
casualties issued by the Adjutant-
General here at midnight. Corporal
Sutherland died from the effects of
wounds on March 3.The names of twenty-nine Cana-
dian soldiers are in the week-end list
of casualties. Practically all branches
of the service are represented in the
casualties.Corpl. Sutherland was born in Win-
nipeg, Man., and celebrated his 21st
birthday in the trenches last October.
Educated at the St. Francis College
School at Richmond, Que., he came to
McGill in 1911, entering the class of
Arts '15. In August, 1914, when he
(Continued on Page 4.)

T. W. L. MACDERMOT

Member of Arts '17 Running for the
Presidency of the Track
Club.Terence W. L. MacDermot, candidate
for the Presidency of the Track Club,
is a member of the class of Arts '17,
and prominent in various lines of stu-
dent activity. Born at Ropley, Gorton-
town, Jamaica, B.W.I., on Septem-
ber 13, 1896, he was educated by private
tuition and at the Montreal High
School. At the latter institution he
commenced work on the track and
was a member of the championship
track team of 1913, which competed
at Sherbrooke. He was also captain
of his class hockey team. Mr. Mac-
Dermot, who is Editor-in-Chief of the
McGill Daily, has risen from the
rank of associate editor. He is as-
sistant secretary of the Literary and
Debate Society, a member of the Busi-
ness Board of the 1917 Annual and a
member of the Reading Room Com-
mittee of the Arts Undergraduates'
Society. He has played class hockey
since entering the University and was
a member of the Junior Hockey team
in 1914-15. He also played on his
class football team for two years, and
is class representative of the Track
Club Executive. Mr. MacDermot is
secretary of the Harrier Club, was a
member of the Intercollegiate Harrier
team in 1914, and of the Arts
(Continued on Page 3.)If such a unit can be used by
the Department of Militia and
Defence, and if authorization can
be secured from the authorities
at Ottawa, a McGill Battery of
Siege Artillery, to be recruited
at the close of the present ses-
sion, is practically available for
service. For some time past the
question of the formation of
such a unit has been quietly dis-
cussed with a minimum of pub-
licity, and as a result of this and
of a quiet canvass which has
been carried on in the different
faculties of the University there
seems now to be no doubt that
the filling of such a battery in
the University is possible. The
results of this canvass are most
encouraging, and the Daily
learns from an authoritative
source of information that at
least half the desired number of
men have signified their readi-
ness to enlist in a battery of
Siege Artillery to be officered
and manned by members of the
teaching staff and of the stu-
dent body of the University.The idea of a McGill Siege
Battery, as the most preferable
combatant unit, had its origin
among those students and mem-
bers of the teaching staff who
already have had considerable
experience in heavy artillery
work. Siege Artillery—the
heaviest type—appeal to them
because of this previous experi-
ence and because of its interest
and attractiveness to college
men as a result of the fine tech-
nical knowledge and skill re-
quired. The McGill General Hos-
pital is the only McGill unit now
at the front. Although McGill's
Roll of Honor is a very large
and creditable one, it has perhaps
been long felt that it would be
fitting for the University to
send to the firing line a distinc-
tively McGill combatant unit.
The idea is to make the McGill
Siege Battery, if needed and
authorized, a McGill unit in re-
ality as well as in name, and to
have, if not all, at least the large
majority of the officers, non-
commissioned officers and men
from the teaching staff and the
students. Should places in the
unit be still available after draw-
ing from these sources, they will
be filled by graduates.The scheme, the Daily learns,
has the hearty sympathy and
support of the University auth-
orities and staff. The whole
question now is one of the need,
for authorization is doubtless
based on need.It is an interesting fact that,
although no publicity has been
given to the siege battery idea
outside of student circles, so at-
tractive is the unit and so rapidly
has news of the possibility or
its formation travelled that ap-
plications "to serve in any capac-
ity" have already been received
from graduates—engineers and
lawyers—located in places as far
distant and unexpected as Cal-
gary, Alta., and the Porcupine
mining region of Ontario.The establishment of a bat-
tery of Siege Artillery, such as
it is proposed to form at McGill,
and including an ammunition
column amounts to 218 officers,
non-commissioned officers and
men, made up as follows: One
major, one captain, four lieuten-
ants, one battery sergeant-major,
one quartermaster sergeant,
six sergeants, six corporals,
eight bombardiers, two smiths,
one wheeler, two trumpeters, six
batmen, one hundred or airmen
matmen and 178 gunners.No information is as yet avail-
able with regard to the composi-
(Continued on Page 3.)

FRANK B. COMMON

Member of Law '17 Running for the
Presidency of the Students'
Society.Frank B. Common, M.A., Law '17,
was born in Montreal in 1891 and
educated at the Montreal High School
where he was class president for
each of the four senior years of the
school, secretary-treasurer High
School Hockey Club, and played on
Football and Basketball teams.He entered Arts in 1909, taking an
honour course in Economics and Pol-
itical Science and graduating in 1913
with First Rank Honours. Mr. Com-
mon carried on post-graduate studies
in the department of Economics and
Political Science during the following
year and received the degree of Mas-
ter of Arts in 1914. He declined an
offer from the Canadian Department
of Trade and Commerce of a position
as a Foreign Trade Commissioner for
Canada in order to carry on studies
in Law. He entered Law in the fall
of 1914, and led the class in final ex-
aminations, winning the scholarship
in the first year.Since entering college, Mr. Com-
mon's activities have been numerous
and are as follows:—President First Year Arts, 1909-10;
Sophomore President, 1910-11; Vice-
President Arts Undergraduate Soci-
ety, 1911-12; Business Board, 1913
Annual; Class Hockey and Football;
Associate Secretary, McGill Y.M.C.
A., 1913-14; President Political Econ-
omy Club, 1913-14; Advisory Board of
McGill Y.M.C.A., 1914-15; Secretary
Law Undergraduate Society, 1914-15;
Leader Routers' Club, 1914-15; Presi-

KEEN CONTEST FOR WICKSTEED

B. A. Klein, Sci. '16, Was Winner
of Silver Medal.

EXCELLENT EXHIBITION.

Bronze Trophy Went to Aggi-
man, Sci. '17—Dr. Harvey's
to Anderson, Sci. '19.The annual Wicksteed gymnastic
competition was brought to a close
on Saturday afternoon. The competi-
tion was perhaps one of the keenest
and most closely contested that has
been held in a great many years.
When the points were totalled it
was found that there was only seven
tenths of a point separating the first
three men in the bronze medal con-
test, and one and four-tenths separ-
ating the first two in the special com-
petition for Dr. Harvey's trophy. It
was most unfortunate that W. C.
Lowry, last year's winner in the ju-
nior competition, and who this year
was competing for the senior medal,
was prevented from finishing the
competition owing to an attack of
grippe. The field in this division
was, therefore, left clear for B. A.
Klein, Sci. '16, who put up a very ele-
(Continued on Page 4.)

DONALD C. SMELZER

Member of Med. '18 Running for the
Presidency of the Track
Club.Donald C. Smelzer, Med. '18, run-
ning for the Presidency of the Track
Club, was born in this city on Janu-
ary 7, 1896, and attended Westmount
Academy for a period of ten years.
During this time he participated in
every annual track and field meet
held there. One record which he made
still stands.In 1913 he acted as captain of the
track team which represented this
school at Sherbrooke. He also played
class hockey and football and was
corresponding secretary of the Aca-
demy Bulletin, 1912-13.In 1914 Mr. Smelzer equalled the
present college record in the 100-
yards event at the Interyear sports.
He was a member of the Intercolle-
giate Track Team and was granted his
major block M. In 1915 he was a
member of the University Track
Team and the winner of the aggregate
championship at the Annual
Sports. Mr. Smelzer is secretary of
the Track Club and the class repre-
sentative of Medicine '18. He has
been a member of the class football
team for three seasons.Mr. Smelzer spent three summers
in the office of the Ogilvie Flour
Mills, Ltd., and two summers with
the Canada Steamship Lines, Ltd.

McGill Battery

The formation of an all-McGill battery is a possibility which has long been a hope and will now be the great desire of McGill students in every faculty and every year. With few exceptions, all who have contributed to the numberless conversations on the all-absorbing topic of a McGill unit, officered by McGill men, named with the college name, and consisting almost exclusively of members of the University, have begun and finished up with the firm conviction that an artillery unit would be the most acceptable and would make the strongest appeal to the college as a whole.

This for several reasons. Firstly, a battery has an advantage over a large infantry, army service or medical unit, as it requires a workable number of men. That is to say, it is impossible just now to get, say, one thousand or five hundred undergraduates, who, with all the will in the world for a hundred and one really worthy causes, cannot volunteer for active service. The inevitable consequence would be that those raising the unit would be compelled to have recourse to outside sources for men to complete the total number.

Again, the artillery is a branch of the service eminently suited for university men as, one which utilizes to the utmost the mental training which is the primary advantage that they have over men in other walks of life, and then springing out this fact because the artillery work requires a higher standard of knowledge in those taking part in it than the lower ranks do in other work. The general feeling in a student's mind is that this war is so vast in its demands, so literally democratic, that everyone in the Empire, from the scavenger man to the classics professor, has a place waiting for him if only it can be found. Consequently he regards his two or three years at college as being thrown away in the interests of his country if they do not enable him to put into action the training those years have given him. However coldly calculating this may appear to those much more admirable persons perhaps, to whom the need of the times obliterated any possibility for calculation and impels them to do anything rather than wait, it is none the less true, and in the end may prove immensely more valuable. Heroics are praiseworthy, but intelligent heroics are even more so.

Take the Faculty of Science—we meant the undergraduates—and examine their natural relation to such a battery as is proposed. Why, here is supreme opportunity to use the technical training of the engineer to the highest degree. All those who join from Science will combine the intellectual curiosity of the collegian with the capacity to satisfy it, and as a result the rank and file of the battery will be so well versed in the work, not only of their own post, but even of that of the O. C., that the thorough and precise competency of the whole battery will be at once obvious. But let it not be thought that the men of Science will be the only ones desired in the unit. That is exactly the beauty of the thing, because while the A. S. C. or the A. M. C. appeals specifically to those with a natural bent, and sometimes are even a little repellent to those without, the work in the artillery can be learned and enjoyed by all who have the barest predilection to practical work.

The pre-eminent suitability of a battery to men in college is then quite clear.

To apply it to McGill.

We have recently heard of the authorization of a Toronto battery, and previously Queen's University had sent away an artillery unit of her own, while another is in formation. Our college, too, has long been desirous of having a "McGill" unit on the fields of France. What's in a name? some will ask. "McGill's" Roll of Honor is a glorious rebuttal of the charge of military backwardness implied by this absence of a "McGill." Quite so, but there is a lot in a name when it means no more nor less than it says, and by recruiting a fighting unit which is McGill in all its members, the University would have a concrete and properly designated representation at the front.

The advantages of having an all-McGill battery are manifest. The whole would be a big family, all the more joyously conscious of its worth to the Motherland, because of glory reflected on its Alma Mater. Esprit de corps is a fundamental asset for the best kind of work in a fighting body, and the purely McGill character of such a body would insure this asset in the highest degree.

As the fact of the battery, as far as McGill students are concerned, is on a sure basis, there only remains for the militia authorities' decision as to the necessity for such a battery to have the whole thing go on with a swing.

With the authorization which we hope will come, there seems little that can prevent the unit from being a huge success and a credit to the University.

Editorial Notes

For some time past complaints have been received concerning the noise which certain students have been making in one of the buildings. There is another nuisance which is ever growing

FIELD DAY A GREAT EVENT

Annual R. V. C. Field Day Was a Great Success.

FRESHETTES VICTORIOUS.

Miss Currie and Miss Spier Tied for the Individual Championships.

The annual inter-year sports were held in the R. V. C. gymnasium on Saturday afternoon. In former years these sports were held on two afternoons, but this year a change was made, and all events were run off on the same day. That this change was popular was plainly shown by the keen enthusiasm of the competitors, and the unflagging interest of the spectators.

The programme was well arranged. The variety of items prevented any monotony, the events balancing each other in such a manner that the audience was always keenly interested. To those watching, the window jumping and high jump appealed the most. In both of these the style was excellent. In the former, Miss McLaren jumped through a spare of one foot five inches with ease. This comes within one inch of the college record. It was a pity that she did not try to equal the record, if not break it. Miss Price was second, with one foot six inches.

In the high jump, Miss McLaren again won first place, clearing 3 feet 10 inches. This event was not up to the usual standard. In other years the four-foot mark was always reached. The college record is 4 feet 2 inches. The freshman class won all three places in the high jump.

The running races present some difficulties. The gymnasium is an awkward place to hold them, as it is small and the floor is slippery. Each runner runs against time, and it is hard for her to judge her own speed. Nevertheless, these races are always well contested.

In the 60 yards, Miss Currie came first. Time, 13½ sec. Miss Spier, who came in in 13 sec., was disqualified for a premature start.

Miss Spier won the 120 yards in 24.5 sec., with Miss Currie second.

The three novelty races—head-balancing, obstacle and three-legged—caused much amusement. The obstacle race required cool judgment and quick thinking. To forget the order in which obstacles were to be overcome was a fatal error. Some contestants had a lingering attachment for the empty barrel. Miss Wyatt gained the premier honors here.

Head-balancing was won by Miss Fowler in splendid time. This appears simple until it is tried.

Several spills in the three-legged race caused mix-ups, which added to the enjoyment of the audience. As these spills were not dangerous, except to the winning ability of the couple concerned, they were provocative of much mirth. Miss MacDonald and Miss Currie won in bandy fashion.

Miss Spier took first place in vaulting, winning by a comfortable margin over her next opponent.

The class event took the form of a team basketball race. The Sophomores were disqualified for passing the ball the wrong way. The points went to the Juniors, Seniors and Freshies.

Adding the total points won by each year, the judges found that the Juniors and Freshies had tied for the trophy. A play-off took place. Throwing the basketball for distance was chosen as the deciding event. The first year won, and thus are holders of the inter-year sports shield.

Miss Currie '16 and Miss Spier '17 tied for the individual championship, each having 11 points to her credit. It was decided to give them both cups. Miss McLaren came next with 10 points.

Miss Currie and Miss McLaren deserve special mention for style.

The summary of events is as follows:

Vaulting—1, Miss Spier; 2, Miss Grindley; 3, Miss Abbott.

60-yards race—1, Miss Currie; 2, Miss L. MacDonald; 3, Miss Wyatt.

Time, 13.1-3 sec.

Window-jumping—1, Miss McLaren; 2, Miss Price; 3, Miss Cameron.

Walking race—1, Miss MacDonald; 2, Miss Goodwin; 3, Miss McNaughton.

Three-legged race—1, Seniors (Miss

and which can only be stamped out by the students themselves. Certain undergraduates have acquired the annoying habit of wanting to open the door and look in whenever they see a door that is closed. There is nothing more annoying to professor or to student than, in the midst of a lecture, to have some one open the door, and then, seeing that the room is occupied, close it again with a bang, even omitting the accustomed "Excuse me." Many times interesting discussions have been rudely broken by the said students, and it is time that the nuisance stopped. Although it is the work which might well be ascribed to the greenest freshmen, yet the blame cannot be laid upon these students, as many members of other years are equally responsible. Let these students remember that their convenience is not the only thing to be considered.

Montreal and Boston illustrated newspapers have fallen into a curious error in designating No. 9 Field Ambulance, which recently left on overseas service, as "mainly officered and recruited from the medical professors and undergraduates of McGill." It is true that No. 9 Field Ambulance has on its strength a number of McGill men, but in this respect it is in no wise different from practically every other unit which has left Montreal since recruiting commenced. Why it should be singled out for representation as a McGill unit seems difficult of comprehension.

McGILLIANA

James Harkness, M.A. (Cantab), F.R.S.C.

James Harkness, M.A., F.R.S.C., Peter Redpath Professor of Pure Mathematics, is English, and a graduate of Trinity College, Cambridge.

His record of student days is noteworthy, in that he was a "major scholar" at Cambridge, and ranked first in the honor examinations for the intermediate and the B. A. degree at London University.

Shortly after graduation he was appointed to the staff of Bryn Mawr College, Pennsylvania, as assistant lecturer in mathematics. During fifteen years on the teaching staff of this college he rose to the position of full professor, until, in 1903, he was called to McGill as Professor of Pure Mathematics and head of the Mathematical Department in the Faculty of Arts.

Prof. Harkness has, in conjunction with Prof. Morley, produced a thesis on the "Theory of Functions" that displays marked originality of treatment, combined with that clearness of exposition that has won for him a truly enviable reputation as a teacher of mathematics. This treatise is broad in scope, comprising researches on infinite series; real functions of real variables; algebraic, elliptic and double theta functions; Abelian integrals and Riemann surfaces. As an instance of the professional estimate of this mathematical work, we cite that it is used, by the University of Toronto in its honor courses in functions.

Professor Harkness has further contributed in a very real way to McGill's renown by having placed his mathematical ability and wide reading knowledge of pure and natural sciences at the disposal of Sir Ernest Rutherford, whose genius for interpreting experimental phenomena, together with his colleague's deft manipulation and construction of mathematical formulae have placed McGill in a high position in the development of the new science of radio-activity. The number of scientific papers on radio-activity published by Prof. Rutherford during his last three years at McGill was stupendous. Lacking at that time much of that facility in mathematical physics that he has since acquired, he chose to turn his chief attention to experimental work, while Prof. Harkness lent him aid in interpreting the results mathematically.

Recently a signal distinction has been conferred on Prof. Harkness when he was selected from among the world's authorities on functions to contribute the article on Elliptic Functions to the great German Encyclopaedia of Mathematics that is being compiled. In order to appreciate even to a small degree what the term "authority on mathematical functions" implies, one must understand that a student in honor mathematics at McGill but begins the study of the most elementary of the functions in his fourth year.

An incident occurred a couple of years ago that illustrates the breadth of Prof. Harkness' reading in the vast library of mathematical science. A paper had lately appeared in a physical journal, in which an original mathematician had obtained correct results by using a power series in "square root differentiation," which he had carefully defined. The lecturer, from whom I have the story, an Associate Professor in Mathematics, being greatly excited over this startling discovery—he had never heard of square-root differentiation and could not imagine it—had called at Prof. Harkness' study to discuss the matter. Greatly to his surprise, Prof. Harkness was able to inform him that there

Currie and Miss MacDonald; 2, Freshies (Miss L. MacDonald and Miss L. Cruickshanks); 3, Juniors (Miss Spier and Miss Wyatt).

High jump—1, Miss McLaren; 2, Miss Abbott; 3, Miss Blampin. 3 feet 10 ins.

Head-balancing—1, Miss Fowler; 2, Miss Duff; 3, Miss Lindsay.

120-yards race—Miss Spier; 2, Miss Currie; 3, Miss Wyatt. 24.4-5 sec.

Obstacle race—1, Miss Wyatt; 2, Miss Currie; 3, Miss Spier.

Team basketball—1, Juniors; 2, Seniors; 3, Freshies.

Points—First year, 27; second year, 12; third year, 27; fourth year, 24. Play-off won by first year.

Individual—Miss Currie and Miss Spier, 11 points; Miss McLaren, 10 points.

was a piece of theory among Riemann's earlier works that made square-root differentiation and its powers a possibility; and, further, that the proof was not free from error which he substantiated by producing Cauchy's criticism on this very investigation. All this accuracy of detail on a point that had previously been of only theoretical importance.

Prof. Harkness is rendering an important service to McGill as chairman of the Committee on Graduate Studies, which position he has held consecutively since the session, 1910-11. The graduate school has now become a well-established branch of our university's activities, as the opportunities of research in the library and in many of the laboratories are proving increasingly attractive to her students. Much credit is surely due to those heads of departments who so unselfishly superintend the special investigation and to the committee that must prescribe and later criticize the theses.

As a lecturer, Prof. Harkness ranks very high among teachers of science. He has a keenly logical mind, is lucid in explanation, and speaks so pure a grade of English as to be pleasingly distinctive, together with an almost uncanny faculty of settling at first attempt on the puzzled students difficulty. His slow step on the stair is the signal for a hurried seating of the class which awaits in silence the appearance of an armful of books surrounded by a strikingly austere countenance. His several books form a reference library for the day's lectures. Frequently indeed is a proof embellished by sub-notes from minor authorities, and it is seldom that any but the most rigorous demonstration of a proposition is given to the class.

When one meets Prof. Harkness outside the lecture room, the affability of his manner and his singularly broadmindedness on current topics will be sure to impress. However, he seems to enter the lecture room with but one idea in mind—that, the exposition of mathematics. One may be a student in daily attendance at his lectures, yet few could lay claim to any recognition other than a pleasant "good morning," and that at rare intervals. This abstraction does not extend throughout the lecture. Any question bearing directly or even indirectly on the subjects in hand will receive most sympathetic attention, with an appreciation of the questioner's limited capacity that demonstrates his natural gift as teacher, careful training in the school of experience, and an engaging sense of association. It is certainly impressive to see members of his advanced classes vying in appreciation of their lecturer as they discuss a particularly brilliant lecture or series of lectures. In no other class at McGill have I seen such enthusiasm aroused by the sheer force of personality of the lecturer. His consciousness of method stands revealed to any who may enter his lecture room. I have known Prof. Harkness to leave at the end of a protracted lecture period with the whole theme of the lecture, minus a few lemmas and explanatory notes on an average sized board.

If a mathematics course aims to develop power of concentration, conciseness of thought and expression and logical reasoning, one can surely consider Prof. Harkness in these respects the ideal of his students. Nothing is more marked in his lectures than the insistence on a proper conception and use of mathematical logic. His personality fairly emanates order and conciseness, which leaves one with a very sincere regard for these sterling qualities after having followed unerringly through the mazes of a proof that may require two months of demonstration in lectures.

Business Experience:—One summer as construction timekeeper and paymaster for the Dominion Bridge Company. One summer as hotel clerk at Manoir Richelieu, Murray Bay. One summer as salesman. One year as associate secretary Strathcona Hall. One summer as reporter for Journal of Commerce. Eighteen months with the firm of Brown, Montgomery and McMichael, Solicitors.

DENTAL SOCIETY.

Dental Society will hold a meeting to-night in the new Medical Building, at 8.15. Reports from Dinner Committee and Treasurer will be read.

Dr. Henry, Professor of Materia Medica and Pathology will address the Society on the important subject of "Treatment of Diseased Teeth in Children and How to Handle Them." This should prove very interesting to both seniors and juniors and all dental students are urgently requested to attend these meetings.

RIFLE MEETS IN STATES.

Columbia University defeated Ohio State in the sixth rifle meet of the year by the score of 975 to 964 according to the official announcement. This is the third meet that Columbia has won this year, as she has also defeated Penn. State and the Connecticut Aggies, and has been defeated by Harvard, Reneselaer, and Iowa State. In the meet with Penn. State Columbia led Class C with a score of 982 points, Iowa State, the leading team in the last meet, failed to come up to this record by one point. She defeated the College of St. Thomas by the score of 981 to 955.

The meet between Columbia and

Goodwin's Golf School Now Open

under the direction of Mr. A. Woodward, of the Country Club, St. Lambert.

There are no club charges for joining, and the rates for instruction include the use of clubs and balls.

Appointments can be made in person or by phoning to the Sporting Goods Department.

NEWS OF GRADUATES AND PAST STUDENTS

LT. MACFARLANE AMONG KILLED

Was a Graduate of Science With the Class of '10.

D. M. TRAPNELL IS MISSING

Lieut. H. M. Lyster, Sci. '13, of Royal Engineers, is Reported Wounded.

News has been received by relatives in the city of the death from wounds of Lieut. Robert George Macfarlane, Sci. '10, attached to the Royal Engineers. Lieut. Macfarlane was born in Huntingdon, Que., twenty-seven years ago, the son of the late Robert Macfarlane, and secured his primary education at the Huntingdon Academy. From that institution he matriculated into McGill, taking the course in Mining. He was graduated in 1910. Lieut. Macfarlane was a quiet, chaste, and conscientious and earnest student. After graduation he was employed with various mining corporations, including the Mond Nickel Company, Garson, Ont., and the Consolidated Mining and Smelting Company at Trail, B. C. Both his father and mother are dead. Innes P. Macfarlane, Agriculture '18, is a brother, and two sisters are graduates of the Teachers' course at Macdonald College. One of the latter is teaching at Inverness, Que.

"We knew him as an extremely fine fellow, a steady sort of chap, always good-natured," said Dr. J. Bunsall Porter, Professor of Mining to the McGill Daily.

Lance-Corp. Donald Morison Trapnell, past student, has been missing since April 25, 1915, and it is assumed that he has been killed, since there is no trace of him either in France or in German detention camps. Lance-Corporal Trapnell belonged to the class of Science '14, and enlisted in this city in response to the first call for volunteers. He was a son of R. H. Trapnell, eyesight specialist, St. John's, Nfld.

A late British casualty list contains the name of Second Lieut. Horace M. Lyster, Sci. '13, Royal Engineers, who is reported as wounded. Lieut. Lyster enlisted here last summer with the Second Universities Company, and with that unit crossed to France to reinforce the Princess Patricia's Canadian Light Infantry. After service with the Pats for some months, he secured last December a commission in the Royal Engineers, and, following special training in England, had been with his corps on the western front. The home of Second Lieut. Lyster is in Kirkdale, Que.

Lieuts. Eric Billington, Sci. '13, and Gwynn G. Gibbins, Sci. '10, who were recently wounded in France through the explosion of a quantity of German ammunition, which they were engaged in destroying, are now in an English hospital recovering from their wounds, according to word received by Dr. J. Donsall Porter, Professor of Mining. Both Lieut. Billington and Lieut. Gibbins are former students and associates of Dr. Porter. The condition of Lieut. Billington, who is so well known throughout Canada because of his prominence in intercollegiate football, was for a time quite serious, so much so that his parents were summoned from England to his bedside in France. A foot has been amputated, while the wounds to his arm are serious. He is now recovering satisfactorily, however, and has improved very much. The recovery of Lieut. Billington has been doubtless due to his splendid constitution.

Major Andrew G. L. MacNaughton, Sci. '10, who was wounded in April, 1915, has recuperated and returned to the front, on the headquarters staff of the 6th Howitzer Brigade, 21st Battery, 2nd Canadian Division.

Lieut. W. E. Bull, Sci. '15, who a few days ago was reported seriously wounded, is now much better. A message from Ottawa received by his parents announced that his name has been stricken off the "serious" list, and that he is doing well. A cablegram was also received from Major-General Carson, a personal friend of the young officer's father, Mylius Bull, stating that the lieutenant was progressing favorably.

Lieut. E. F. Newcombe, Law '13, of the Princess Patricia's Canadian Light Infantry, recently wounded, is progressing favorably in a London hospital.

Lieut. G. Boyd Webster, Sci. '10, Royal Engineers, recently wounded, is now a patient in the Queen Alexandra Hospital in London. Mrs. George R. Webster, of Toronto, his mother, has sailed to be with him.

Speaking at St. John, N.B., a few nights ago, Dr. G. G. Corbet, Med. '98, who has been invalided home, stated that at the time of the second battle of Ypres he was at Rouen, where many men were sent down who had been badly wounded, and some of those who will yet go. About one hundred years ago, under circumstances not quite the same, but not altogether dissimilar, Patrick Henry coined the famous phrase, "Give me liberty or give me death," and, he concluded, "death is preferable any time to being ground under an oppressor's heel."

THE DEATH LIST FOR THE WEEK

Hon. C. A. Chauveau Expired Very Suddenly in New York City.

Hon. Dr. Charles Alexander Chauveau, Law '67, formerly a member of the Provincial Cabinet and later Judge of the Sessions of the Peace, Quebec City, died very suddenly on the Ward Lane pier, at the foot of Wall Street, New York, late Tuesday afternoon, shortly after he disembarked from the steamship Saratoga. Hon. Mr. and Mrs. Chauveau arrived on the Saratoga after a two months' sojourn in Havana. The Rev. Father Grogan, of the Roman Catholic Immigrant Home, New York, administered the last rites of the church to Mr. Chauveau before he died.

Hon. Mr. Chauveau was the second son of the late Hon. P. J. O. Chauveau, first premier of Quebec after Confederation. Born in Quebec City in 1847, he was educated at St. Mary's (Jesuit) College, Montreal and at McGill, where he has graduated in law at the age of twenty. Laval gave him the degree of LL.D. in 1894. Hon. Mr. Chauveau was called to the bar in 1863 and was created Queen's Counsel in 1878. He sat for Rimouski in the Provincial House from 1872-1880, and was Solicitor-General and Provincial Secretary in the Joly de Lotbiniere administration. He retired as Judge of the Sessions of the Peace of Quebec in 1910.

The death occurred on Wednesday in Paris of Charles Paul Lafontaine, son of Judge Lafontaine, of the Court of Sessions.

Mr. Lafontaine was a member of the class of Law '15 for two years, but decided to finish his studies in Paris. He received his degree of B.A. from St. Mary's College and took a three-years' course in law at Laval University. From Laval he came to McGill, but owing to ill-health it was necessary for him to discontinue his studies here and went to Paris to recuperate his health and to finish his studies. For a time he seemed to be improving, but ten days ago his father received a cablegram stating that the brilliant young student was dying.

The death has occurred in this city of Dr. Lewis Davidson Ross, Med. '84. The funeral will be private. Dr. Ross was a son of the late David Alexander Ross, Montreal.

F. H. Grindley, Agr. '11, who has been at the Arkansas Hot Springs for his health, has so far recovered that he expects to be back in Ottawa by the end of January.

A. A. Campbell, Agr. '12, has been transferred from the C.P.R. farm at (Continued on Page 4.)

of the belligerent nations, and that no part of the British Empire has done better than Canada. Dr. Corbet stated that he had come through several bombardments and the sensation is not half so bad as some think. The greatest music to the soldiers' ears is that of their own guns.

With respect to the work of the medical department, Dr. Corbet stated that, as the men were wounded, they are looked after on the spot as well as conditions will permit, and then sent back to the field ambulance, where they receive further treatment, from which point they are again transferred to the main station, where they are again looked after, and then sent, by trains, to the hospitals, where they come under the careful supervision of the nurses. "And," he added, "the nurses in this war are doing a great work. Our own Canadian nurses are the equal of any."

"We need many things over there," he stated, "so far, the war is in our favor, yet we need two men for every one of the enemy; two guns for every one they have, and two rounds of ammunition for every round they possess."

"Every man," he added, "owes a duty to his country, his King, and his Government, and he has a right to accept this responsibility, especially when the life of his country is at stake. It is time now that all come and do their part and aid in the defence of the British Empire. Canada has paid the price and has paid it dearly, and Belgium tells its own tale."

"We have a right," he said, "to be proud of those who have already gone and those who will yet go. About one hundred years ago, under circumstances not quite the same, but not altogether dissimilar, Patrick Henry coined the famous phrase, 'Give me liberty or give me death,' and, he concluded, 'death is preferable any time to being ground under an oppressor's heel.'"

TAIT MCKENZIE'S WORK OVERSEAS

In Charge of Medical Work at Manchester Depot.

TREATING WOUNDED MEN

Physical Exercises Enter Largely into Fitting of "Tommies" to Re-enter Trenches.

The Command Gazette, published at the Command Depot, Heaton Hall, Manchester, Eng., under the editorship of Lance-Corp. B. F. Hoy, of the 5th King's Liverpool Regiment, publishes a sketch of Major R. Tait McKenzie, R.A.M.C., medical officer in charge of the depot, in a recent issue. The appreciation is written by "Lancelot," and contains much information concerning Major McKenzie, whose work as an eminent physical educationist and sculptor is so well known to McGill men. Dr. McKenzie is doing a great deal of massage work among the wounded troops at Manchester. The article reads: "I am very much afraid that I shall be marked 'fit for duty' before the next 24 hours have elapsed, but nevertheless these folks must not be allowed to hide their light under a bushel."

"The major of the No. 9's is a Canadian and he was born in Almonte, Ont. He went to the Collegiate Institute, Ottawa, and then to McGill University, Montreal, from which he graduated in the year 1892, and at once became house surgeon in the Montreal General Hospital, a post he held for one year. The next summer he spent as surgeon on board one of the Beaver Line ships plying between Montreal and Liverpool, following which he commenced practice in Montreal, and soon became household physician on the staff of the Governor-General of Canada, holding the post for a year, during which he travelled extensively throughout Canada, England and Scotland."

"Resuming practice, he became demonstrator and then lecturer in anatomy at McGill University. Having been prominent in athletic sports and gymnastics while at college, he undertook the medical supervision of sports and exercises at McGill, and he became the first medical director on that subject."

"In 1904 he accepted the chair of professor of physical education and physical therapy at the University of Pennsylvania, a position he still holds, being absent on leave at present. He organized the system of exercise which is required from all the 8,000 students of that university, and gave courses of lectures to the medical students on massage and exercise in medicine."

"He has been for three years president of the American Physical Education Association, and has represented America at a number of international congresses on physical exercise and hygiene at London, Paris and Brussels. In 1912 he was on the American committee for the Olympic Games at Stockholm, and was decorated by the King for his distinguished service in athletics and art."

"As a sculptor he is best known as the interpreter of the athlete in action, and examples of his work in bronze are to be found in the Metropolitan Museum, New York; National Gallery, Ottawa; Ashmolean Museum, Oxford; Fitzwilliam Museum, Cambridge, and in many private collections both here and abroad, while his portraits in bas relief are to be found in the National Portrait Gallery, Edinburgh; University of Pennsylvania; McGill and Brown Universities, and in many private collections."

"He has written extensively on medical subjects connected with anatomy, physical education and treatment of diseases by massage and exercise, and his text-book, 'Exercise in Education and Medicine,' has become a standard work. He is the greatest living authority on 'Movement.'"

"Last June he came over from Philadelphia, took a commission in the R.A.M.C., and was appointed medical officer at the headquarters gymnasium at Aldershot. He then made inspection tours with the inspector of gymnastics, reported on the necessity for treating convalescent soldiers, and was appointed as medical officer in charge last October."

"This biography would not be complete were I to miss out the fact that the Major is also a composer of verse, as the 'Reply to Aurore' will testify."

"One and all we know his familiar figure, and he is to be seen most days giving personal attention to the physical training classes in the Park. May he live long to impart to others the wonderful products of his brain and vision."

A McGill BATTERY IS POSSIBLE.

THE HONOR ROLL

CASUALTIES.
Lyster, Second Lieut. H.M., Sci. '13, Royal Engineers, wounded.
Macfarlane, Second Lieut. R.G., Sci. '10, Royal Engineers, died of wounds.
Trapnell, Lance-Corporal D.M., Sci. '14, 11th Battalion, C.E.F., missing, believed killed.

EFFICIENCY OF THE ARTILLERY

Night Alarms Show Despatch With Which Guns Can Be Worked.

The remarkable efficiency of the Canadian artillery on the battlefield is fittingly shown by extracts from a letter received at the University from Sergeant-Major A. G. Cushing, Sci. '12, 27th Battery, C.F.A. Sergt.-Major Cushing writes:

"We are now in Belgium, but as the biggest part of the B.E.F. is in that country, that perhaps does not give much information. Still, it is the best I am permitted to do."

"Of course, we are not right at the trenches, but near enough for a few shells to pass over occasionally. After one has been near the line, one can make a pretty good guess as to what they are as they fly through the air. A few of their English names are: whizz-bangs, coal boxes, and Jack Johnsons. As a rule, we don't pay much attention to them till one makes a sound like it was coming near you. Then everybody automatically gets behind the nearest dugout and waits expectantly. If only one or two shells come your way, all's well, but if you find the enemy knows you're there and is practising on you, you move."

"We are right in the midst of a nest of batteries, big and little, but as our little French-Canadian messman puts it, 'If I hear whizz-z-z bang, I know that's Fritz; if I hear bang-whizz-z, it's all right, that's us.' Fritz is the common name for any and all Germans. One never hears them called anything else."

"At present we are having a very easy time here. The horses are about two miles off and so don't bother us. The only thing is that we must be ready to turn out and open fire any hour, day or night. We have tests every now and then, and perhaps it will surprise you to hear that on an alarm being sounded at night, within all but the guards are asleep, within 45 seconds all four guns will have reported 'ready,' waiting orders to fire on any target."

"But, better than this, the guns are always loaded and laid on the enemy's trenches, and in case a call for help comes from our own trenches, within fifteen seconds of the time the signal was sent by our men, four shells would have burst in the enemy's trenches. This is not theoretical; it has been done and can be done again."

The Last at Gallipoli.

Lieut. Lavell H. Loeson, Med. '15, was one of four officers of the Royal Army Medical Corps who formed the rear guard in the evacuation of the Gallipoli Peninsula. In a letter received he briefly describes his experiences.

"I am at Mudros (an island in the Aegean Sea), safe and sound after the ordeal through which we passed on the peninsula at Cape Helles," he writes. "I was one of four officers to form the rear guard in the evacuation. To say the least and make it mild, we had a rough time of it. The evacuation was finally accomplished on the night of January 8th and the morning of the 9th. We stayed in the camp until 1 o'clock in the morning, then went to the beach and set up a dressing station. We boarded a hospital lighter with our patients at 8 o'clock, waiting at the pier until the troops were all off an hour later."

"The shore magazine was blown up after the men had embarked, and our lighter got struck by flying fragments of stone and shells, and we were covered with showers of mud and earth, only a few of our men being wounded, luckily. We were the last to leave the Cape."

"When our lighter got out to the hospital ship a sea was running that it was found impossible to transfer our wounded, and so we had to stand by until daylight, when we were towed to Imbro and landed. The night was frosty and cold, and we shivered with the damp and the water spraying over the sides."

T. W. L. MACDERMOT.

(Continued from Page 1.)

Championship Faculty harrier team in 1915. Also he is on the Y.M.C.A. Board.

His business experience includes one summer with the Gresham Life Assurance Society; one summer with the construction department of the Grand Trunk Railway; and one summer with the Head Office Accountant's branch of the Bank of British North America.

GRADUATES DONNING KHAKI

Many Enlistments Reported During the Week.

MEDICAL MEN IN THE LEAD

Graduates of Faculty of Medicine Gain Recognition in His Majesty's Forces.

Graduates of the University continue to join His Majesty's forces in large numbers. Particularly is this the case with former students of the Faculty of Medicine, who are responding with a will to the appeal which has gone forth for skilled medical assistance. Below will be found the names of the week's enlistments of graduates and past students as noted by McGill Daily, as well as promotions and news of graduates who are on active service:

Dr. Charles G. Main, Med. '91, practising at St. Stephen, N.B., is going overseas shortly to join the Royal Army Medical Corps on active service. Lieut. Pierre A. Landry, Sci. '03, Canadian Pioneers, has been promoted to the rank of captain.

Capt. Stanley B. Lindsay, Arch. '15, who was invalided home through illness, has sailed to rejoin his unit, the 13th Battalion, C.E.F., at the front.

Calgary Herald: Dr. R. B. O'Callaghan, the well-known physician of this city, left Calgary for England, where he will take a commission in the Royal Army Medical Corps. Dr. O'Callaghan is one of Calgary's most popular younger medical men. Being a graduate of McGill, he has, since the outbreak of the war, been actively connected with recruiting for the university battalions which have been trained at Montreal. Since the outset he has been anxious to offer his services to the Empire, but has only now been able to get his affairs in such shape as to permit him to leave. During Dr. O'Callaghan's absence his practice will be looked after by Dr. J. Scovill Murray (Med. '03), Royal Bank Chambers. Dr. O'Callaghan already has three brothers in the service.

An Ottawa despatch says that it is understood that Col. F. S. Meighen, Arts '89, has been appointed brigadier-general in command of the Canadian troops at Bransbott, England. The Grenadier regiment which he raised at Montreal is now fully organized, and the commanding officer will be appointed at an early date to succeed him.

Major W. E. Nelson, Med. '03, C.A. M.C., who has been connected with the divisional headquarters here, has been transferred to staff service at Ottawa.

Colonel Kenneth Cameron, Arts '81, Med. '87, has succeeded to the command of No. 2 Canadian General Hospital located in Normandy.

Dr. L. T. Ainley, Med. '04, has been named medical officer of the 222nd Overseas Battalion, C.E.F., with the rank of captain.

The Daily has to thank Lieut. H. Don Henry, Arts '14, 15th Duke of Connaught's Own Overseas Battalion, Vancouver, for copies of "The Reveille," the battalion newspaper just inaugurated. The Reveille is a newsy sheet, well made up, and should be a decided help in furthering esprit de corps in the newly-formed unit.

Rev. Charles W. Shelley, graduate of the Montreal Presbyterian College in 1909, has resigned the charge of the First Presbyterian Church, Brockville, to become chaplain of the 39th Battalion, C.E.F.

Lieut. C. C. Graham, past student, attached to the 53rd Battery, C.F.A., at Kingston, was a caller at the Union last week.

Lieut. Hugh C. Farthing, Arts '14, has sailed on overseas service with No. 3 Divisional Train, Army Service Corps.

Capt. C. K. Russell, Arts '07, Med. '01, has been promoted to the rank of major. Capt. Russell is serving with No. 3 Canadian General Hospital (McGill).

Lieut. St. Clair McEwen, Sci. '13, acting paymaster, 19th Battalion, C.E.F., will go to Halifax shortly to take his captain's examinations.

Capt. L. E. Clark, Med. '12, and W. A. Hutton, Med. '13, are attached to "A" Section, No. 2 Field Ambulance.

Capt. A. F. Foss, Med. '06, is in command of "A" Section, No. 2 Field Ambulance Depot, at the Guy Street barracks. Capt. Foss' unit will establish a field hospital at Valcartier when that training camp is re-opened this spring.

Major Harold S. Mucklestone, Med. '05, has returned from Ottawa, where he was attached to the medical services department of the headquarters staff. He has resumed work in the medical department here.

Lieut. Edward Goff Trevor Penny, Arts '07, Law '10, has been appointed to the 11th Eastern Townships Battalion at Sherbrooke, Que. Lieut. Penny was last year a N.C.O. of the McGill C.O.T.C. and last fall took out a commission in the 5th Royal Highlanders, Canadian Militia.

Lieut. Maurice Burke, past student, formerly with the 3rd Battalion, C.E.F., is now attached to the Canadian (Continued on page 4.)

MED. COURSE THIS SUMMER

For Benefit of Students Lately Returned from the Front.

SACRIFICE BY PROFESSORS

Need for Medical Officers at the Front Prompted Action of the Faculty.

After considering the question long and carefully, the Faculty of Medicine have at last decided to give a summer course to those students who have lately returned from the McGill Hospital. This means that the men will start work at once and, studying all summer, will complete their fourth year work by next September thus enabling them to graduate in the spring of 1917.

Great credit is due the members of the Faculty of Medicine for coming to this conclusion for it means a great sacrifice to the professors to teach all summer and then start their regular college work in the fall without any intermediate rest, and nothing but the highest patriotic motives could have prompted such an action.

It was only decided last week to give a summer course to those men now taking their fourth year work, thus enabling some fifty doctors to receive their degree about next Christmas. The faculty decided upon this course after consulting with the military authorities as to the need for medical officers at the front.

However, at that time, no provision had been made for the students who had lately returned from the front, and it was a question as to what these men would do. A few days ago there was published a report that these students would immediately go to Toronto University and be given a course there enabling them to commence their fifth year work next October the report stating that the Medical faculties of the two universities having come to this agreement. How-

ever, this arrangement does not seem to have been made as was reported, for the McGill students will not go to Toronto but will receive their fourth year work here. Without a doubt, the latter course will prove more acceptable to the McGill men concerned.

The men affected by the above action of the Faculty are the following: A. N. Chisholm, Port Covington, B.C.; A. C. Farlinger, Port Covington, N.Y.; B. W. Skinner, Weston, N.S.; W. A. Hunter, Huntingdon, Que.; W. S. Parsons, Montreal; George W. Bissett, Sarnach, B. C.; H. A. DesBrisay, Vancouver, B.C.; Percy S. Tennant, Vernon, B.C.

There are few national institutions of more value and interest to the country than the Royal Military College of Canada. Notwithstanding this, its object and the work it is accomplishing are not sufficiently understood by the general public.

The College is a Government Institution, designed primarily for the purpose of giving instruction in all branches of military science to Cadets and Officers of the Canadian Militia. In fact it corresponds to Woolwich and Sandhurst.

The Commandant and military instructors are all officers on the active list of the Imperial army, sent for the purpose, and there is in addition a complete staff of professors for the civil subjects which form such an important part of the College course. Medical attendance is also provided.

While the College is organized on a strictly military basis the cadets receive a practical and scientific training in subjects essential to a sound modern education.

The course includes a thorough grounding in Mathematics, Civil Engineering, Surveying, Physics, Chemistry, French and English.

The strict discipline maintained at the College is one of the most valuable features of the course, and in addition the cadets receive a complete physical training, including drill and outdoor exercises of all kinds, ensuring health and excellent physical condition.

Commissions in all branches of the Imperial service and Canadian Permanent Force are offered annually.

The diploma of graduation is considered by the authorities conducting the examination for Dominion Land Surveyors to be equivalent to a university degree, and by the regulations of the Law Society of Ontario, it obtains the same exemptions as a B.A. degree.

The length of the course is three years, in three terms of 10 months each.

The total cost of the course, including board, uniform, instructional material, and all extras is about \$300.

The annual competitive examination for admission to the College, takes place in May of each year, at the headquarters of the several military divisions, areas and districts.

For full particulars regarding this examination and for any other information, application should be made to the secretary of the Militia Council, Ottawa, Ont., or to the Commandant, Royal Military College, Kingston, Ont.

PROVINCE of QUEBEC
Department of Colonization, Mines and Fisheries.
The chief minerals of the Province of Quebec are Asbestos, Chromite, Copper, Iron, Gold, Molybdenite, Phosphate, Mica, Graphite, Ornamental and Building Stone, Clays, Etc.
The Mining Law gives absolute security of Title and is very favourable to the Prospector.

MINERS' CERTIFICATES.
First of all, obtain a miner's certificate, from the Department in Quebec or from the nearest agent. The price of this certificate is \$10.00, and it is valid until the first of January following. This certificate gives the right to prospect on public lands and on private lands, on which the mineral rights belong to the Crown.
The holder of the certificate may stake mining claims to the extent of 200 acres.

WORKING CONDITIONS.
During the first six months following the staking of the claim, work on it must be performed to the extent of at least twenty-five days of eight hours.

SIX MONTHS AFTER STAKING.
At the expiration of six months from the date of the staking, the prospector, to retain his rights, must take out a mining license.

MINING LICENSE.
The mining license may cover 40 to 200 acres in unworked territory. The price of this license is Fifty Cents an acre per year, and a fee of \$10.00 on issue. It is valid for one year, and is renewable on the same terms, on producing an affidavit that during the year work has been performed to the extent of at least twenty-five days' labor on each forty acres.

MINING CONCESSION.
Notwithstanding the above, a mining concession may be acquired at any time at the rate of \$5.00 an acre for SUPERIOR METALS, and \$2.00 an acre for INFERIOR MINERALS.

The attention of prospectors is specially called to the territory in the North-Western part of the Province of Quebec, north of the height of land, where important mineralized belts are known to exist.

PROVINCIAL LABORATORY.
Special arrangements have been made with the POLYTECHNIC SCHOOL of LAVAL UNIVERSITY, 238 ST. DENIS STREET, MONTREAL, for the determination, assays and analysis of minerals at very reduced rates for the benefit of miners and prospectors in the Province of Quebec. The well equipped laboratories of this institution and its trained chemists ensure results of undoubted integrity and reliability.

The Bureau of Mines at Quebec will give all the information desired in connection with the mines and mineral resources of the Province, on application addressed to:
HONORE MERCIER,
Minister of Colonization, Mines and Fisheries, Quebec

M. SUTHERLAND DIES OF WOUNDS

(Continued from Page 1.)

was about to enter his senior year. Sutherland enlisted in the 13th Royal Highlanders of the First Canadian Division, being one of the first to join this unit. He was attached to the signal section of the battalion and had served through all the heavy fighting in which the corps had been engaged without sustaining a wound of any kind. At last word, Corp. Sutherland was engaged in working a telephone line by night in the front line trenches. He was about to be transferred in order to secure a commission.

Corp. Sutherland was prominent in student life while an undergraduate of McGill. He was for two years a member of the Board of Directors of the McGill Y.M.C.A., having charge of the Bible study work. He attended the Y.M.C.A. Conference at Northfield and also the Canadian Students' Y.M.C.A. Conference at Kingston, Ont., in 1913. He was secretary of the Arts Undergraduate Society in his Freshman year, was a member of the original editorial staff of McGill Daily, and became known as a runner through his connection with the Track Club.

A brilliant student, Corp. Sutherland won an exhibition upon his entrance to the University and took a bursary in his second year. He intended entering upon a career as foreign missionary of the Presbyterian Church. He was extremely popular with his fellow-students.

Corp. Sutherland was the only son of Rev. H. C. Sutherland, Presbyterian minister at Lancaster, Ont. Two sisters survive.

The complete casualty list is as follows:

1st Battalion.

Wounded—Sergeant James A. Black, London, Ont.; Albert Stanley Boyle, Carbonear, Nfld.
Dangerously ill—Thomas Bendall, London, Eng.; Albert Spies, Eng.

2nd Battalion.

Wm. R. Pakke, West Silver Street, Paris, Ont.

3rd Battalion.

Shell Shock—Lance-Corporal Ernest Smith, Winnipeg.
Severely Wounded—Samuel George James, Buffalo, N.Y.

Wounded—Hector Roy Robinson, 141 Harrison street, Toronto, Ont.

7th Battalion.

Wounded—George Merry Box, England.

8th Battalion.

Died of Wounds, March 3rd—Cecil Harold Honey, Winnipeg, Man.
Wounded—Arthur Stirling Woods, Norwich, England.

10th Battalion.

Died of Wounds—James L. Potter, Balmoral, Man.

13th Battalion.

Died of Wounds, March 3rd—Murray Sutherland, Lancaster, Ont.; Charles Dunbar, Skellarton, N.S.

Wounded—Henry Brogan, Sydney Mines, N.S.; Alexander Birnie, Montreal.

16th Battalion.

Died of Wounds, March 3rd—Lerie Alexander McKay, Vancouver, B.C.
Severely Wounded—John McConnell, Antigonish, N.S.

18th Battalion.

Killed in Action, February 28th—John Hadley, 480 Carlaw avenue, Toronto, Ont.

Wounded—William Asher Lincoln, Eng.; Wm. T. Rowland, 318 North Third street, Minneapolis, Minn.

19th Battalion.

Died of Wounds, March 7th—Lieut. Laurence Percival Kennedy Gibson, 598 Huron street, Toronto, Ont.

20th Battalion.

Died of Wounds, March 2nd—Frederick Charles Swank, 715 Carlaw avenue, Toronto, Ont.

Accidentally Wounded—Lance-Corp. Frederick Ernest Burchell, Emmeo, Ont.

21st Battalion.

Accidentally Wounded—Lewis Strong, Notre Dame Bay, Nfld.

Wounded—Maurice Button, Sussex, England; Lance-Corporal Charles Dagnell, Liverpool, England.

22nd Battalion.

Died of Wounds—Omer Poirier, 481 Seigneurs street, Montreal.
Wounded—Omer Cote, Weedon, Que.

25th Battalion.

Accidentally Wounded, returned to duty—Andrew J. Lynch, Trinty Bay, Nfld.

26th Battalion.

Wounded—Allan M. McGowan, Moores Mills, N.B.; Wm. Gray, Dundee, Scotland.

28th Battalion.

Wounded—William Turner, Winnipeg, Man.

29th Battalion.

Died of Wounds—Ernest A. Kelly, England.

31st Battalion.

Slightly Wounded—Sergeant John Newton, Lancashire, Eng.; Alfred H. Jackson, 211 Clark street, Annex, Montreal.

42nd Battalion.

Wounded, but back at duty—Edmond Beauchamp, St. John, Que.

47th Battalion.

Died, March 10th—Lindon Parkyn, Gloucestershire, Eng.

GRADUATES DONNING KHAKI

(Continued from Page 3.)

dian Ordnance Corps depot at Ashford, Kent, England.

Dr. R. N. W. Shillington, Med. '19, is promoted captain in the Royal Army Medical Corps.

Capt. R. H. Jamieson, Sci. '90, 13th Battalion, C.E.F., has returned to Canada with the latest draft of troops invalided home. He was in command of a company attached to the 15th Battalion, and was wounded during the battle of Ypres. He was very reticent and refused to say anything about himself or the part he took in that memorable fight. His companions, however, praised his actions while under fire. When some of the Germans were charging the Canadian forces, Captain Jamieson, they say, forced his men and leaped forward to repel the enemy. The struggle which ensued was terrible, but the Canadians emerged victoriously, and won the day.

Capt. K. M. Peaty, Arts '06, Sci. '08, who has served throughout with the 13th Bn., Royal Highlanders, C.E.F., has now been promoted to the rank of major.

Dr. G. B. Peat, Med. '06, serving overseas with the Canadian Clearing Hospital, has been promoted to the rank of major.

Dr. R. C. Robinson, Med. '07, has been gazetted temporary lieutenant in the Royal Army Medical Corps. Before enlistment he was practising as Calgary, Alta.

Dr. W. Fred Jackson, Med. '73, has left on overseas service to become attached to the Royal Army Medical Corps.

Major R. Innes, Agr. '11, is at present training the 106th Battalion at Truro, N.S.

William Newton, Agr. '14, who until recently has occupied the position of soil and crop instructor with the British Columbia Government, has enlisted for active service with the Canadian forces.

V. B. Durling, Agr. '15, is with the 73rd Battalion in this city, and has been filling the position of musketry instructor and instructor in physical drill in that unit.

B. T. Reid, Agr. '14, who has been engaged in New Brunswick as assistant field husbandman, has enlisted, and is at present taking a course of instruction at the Artillery School at Kingston.

J. M. Robinson, Agr. '12, who was with the 2nd Canadian Divisional Cyclists, has been transferred to the Canadian Ordnance Corps and is stationed at Ashford, England.

Lieut. C. M. Williams, Agr. '11, is in training with the 106th Battalion at Truro, N.S., preparatory to going overseas.

Lieut.-Col. J. Alex. Hutchison, Med. '84, who was recently appointed chairman of the Pensions Medical Board, has arrived in France on instructions from Ottawa, and will probably take command of one of the Canadian Hospitals now on service. Dr. Hutchison is one of the leading surgeons of the city, and is Professor of Surgery at McGill. He is also chief medical adviser for the Grand Trunk Railway System.

Lieut. L. H. Gass, Sci. '12, has been appointed to take charge of recruiting a draft of 100 men in Montreal as reinforcements to the Canadian Siege Artillery, now overseas.

Hamilton L. (Billy) Gilmour, past student and celebrated hockey player, has taken out a commission in the Woodman's Overseas Battalion, about to be organized at Ottawa.

Hugh C. Mothershead, student at McGill from 1899-1903, has just completed his course in artillery at Kingston, and has taken out a commission with an Ottawa battery, as lieutenant.

George S. Balfour, student of McGill 1910-1911, has taken out a commission as lieutenant with the 199th Battalion in the capacity of signalling officer.

49th Battalion

Wounded—John N. MacDonald, Edmonton, Alta.

54th Battalion

Seriously ill—Emile P. Beghin, Fernie, B.C.

4th Artillery Brigade.

Severely Wounded—Lieut. Frederick George Bond, Guelph, Ont.

Seriously ill—Gunner Frederick Bailey, Orillia, Ont.

First Canadian Machine Gun Company.

Accidentally Killed, March 2—Alex. Craigie, Edinburgh, Scotland.

No. 2 Co. Divisional Train

Died March 10—Color-Sergeant Major Henry St. John Sainty, Aldershot, England.

No. 1 Canadian Field Ambulance

Seriously ill—Stephen P. McAllister, Newcastle-on-Tyne, Eng.

5th Field Company, Canadian Division

Shell Shock—Sapper Henri Marcoux, 479 Chambly street, Montreal.

3rd Pioneer Battalion.

Seriously ill—Thomas Wilkinson, Sheridan, Wyo.

4th Artillery Brigade

Died of appendicitis—G. Frederick Bailey, Orillia, Ont.

Slightly Wounded—Corpl. Elgin Luky, 100 Rose avenue, Toronto.

Headquarters Co. Third Divisional Train.

Washed overboard from Scandinavian, March 4. Drowned—Bernard L. Lacey, Edgerton, Alta.

At the Theatres

AT THE LONDON.

For Monday, Tuesday and Wednesday the chief item will be "Satan Sanderson." Some of the most novel situations in the production of Hallie Erminie Rives' book and play, in which the prominent stage star, Orrin Johnson, plays the title role, are the double exposures, for which, in the making, the film was run through the camera, in many instances, ten and twelve times. Double exposures are the hardest accomplishments of the motion picture director, but in "Satan Sanderson," where Orrin Johnson plays a dual role, director Jack Noble has turned out some exceptional double and triple effects. "Satan Sanderson" in book form was the best seller of its period. As a play it enjoyed more than its share of popularity, both in the larger cities and on tour, but as a motion picture it promises to surpass both its other forms, for the opportunities for big scenes and situations are perfect and were more than taken advantage of by the producer. The third chapter of "The Girl and the Game," featuring Helen Holmes, will be seen with "Satan Sanderson."

What's On

To-day.

7.00—Meeting of Board of Directors, Y.M.C.A., Room A.
8.15—Meeting McGill Dental.

Coming.

March 14—Elections for the Students' Council.

March 15—Semi-annual meeting of the Students' Society.

March 15—Reform Cup Contest.

AN ACTIVE VOLCANO.

The activity of Lassen peak, the only active volcano in the United States, appears to have reached its culmination on May 21, when violent explosive eruptions occurred and "flames" were said for the first time to have issued from the summit of the peak. This eruption caused Hat Creek, a stream on the north side of the mountain, to overflow its bank and sweep down over its entire flood plain a vast sheet of mud and water. Adjacent farms were buried in from one to three feet of mud. Ashes from the explosions were carried eastward more than 200 miles. The outburst is said to have been preceded by an earthquake. Since that date the volcano has subsided, and by the end of September it had nearly ceased its activity. A small eruption was observed as late as August 6 and a pillar of smoke arose from the summit September 9 and 23.

QUEEN'S MAN DEAD.

Word has reached Kingston of the death at the front of a former member of Queen's Rugby team, J. Leonard McQuay, whose home was in Fox Warren, Man. He graduated from Queen's last spring as a B.A. and went overseas with Queen's Engineers under Major Lindsay Malcolm.

CHINA'S ODD YEARLY CENSUS.

The inhabitants of China are counted yearly in a curious manner. The oldest master of every ten houses has to count the families and make a list, which is sent to the Imperial tax-house.

THE DEATH LIST FOR THE WEEK

(Continued from page 3.)

Frederickton to Caledonia Springs, where he is taking up the management of the company's farm at that place.

J. M. Leclair, Agr. '14 is spending the winter at Quebec, where he is engaged by the Quebec Government in connection with the Seed Fair and educational work in that province.

Dr. H. R. Macaulay, Med. '98, has been elected a director of the Sun Life Assurance Company.

Fred Davies, better known as "Runt," McGill's Intercollegiate champion wrestler in 1914, is at present working in Ottawa for the Department of Mines there on molybdenite ore concentration. "Runt" graduated in Mining Engineering in 1914.

B. A. McFarlane, Sci. '14, who was ill for six weeks with pneumonia, returned last week to his position with the Canadian Allis-Chalmers Co., Ltd. H. V. Karnis, former member of Sci. '16, is at present in Ottawa undergoing an operation on his throat and nose. As the operation is not a very serious one, the recuperation will not take long.

D. McNeil, Sci. '15 in Mechanical, is a draughtsman for the Montreal Ammunition Company, in the city.

E. P. Hall, who graduated in metallurgy in 1912, is at present working for the Montreal Ammunition Co., in the capacity of metallurgist of the Lachine plant.

In a letter to The London Times, Sir William Osler, Med. '72, says:

"The cry for reprisals illustrates the exquisitely hellish state of mind into which war can plunge sensible men. Not a pacifist but a 'last ditcher,' yet I refuse to believe that as a nation how bitter soever the provocation, we shall stain our hands in the blood of the innocents. In this matter let us be free from blood-guiltiness, and let not the undying reproach of humanity rest on us as on the Germans."

GIFT TO A UNIVERSITY.

Announcement is made of a gift to the University of Chicago by Mrs. Vaudelia Varnum Thomas, widow of the late Dr. Hiram W. Thomas, of Chicago, which is to be used in maintaining a series of annual lectures in memory of Dr. Thomas. These lectures, when established, are to be given, according to the letter of gift, "by representatives of the larger faith and express the ever-growing thought of the world in religion and life." They are to be made accessible to people outside the university as well as to the members of the student body.

MCGILL PLAY-OFF COMES THIS WEEK

Seniors Busy Getting in Trim for the Games With North Branch.

By winning their game with the Central Y.M.C.A. Saturday night, the North Branch Y.M.C.A. broke the three-cornered tie that existed in the Senior Division of the Interprovincial League. Up to Saturday night, the Central team were the favorites in the North Branch game, but owing to inability to shoot fouls as well as the victors, they lost by 31 to 28 in a hard game. The Central team was much weakened by the absence of Mandisley, one of their regular men, who has given up basketball.

As a result of this game, the McGill Seniors will have to play off for the championship with the North Branch team. This means a great deal of preparation within the next few days, as the play-off will likely occur sometime this week. Arrangements are being made to have home and home games played in the Central and North Branch gymnasiums. Both of these games promise to be hard ones, and will be worth the attendance of any McGill men. A practice will be held to-morrow evening at 6.45 in preparation for the play-off.

JAEGER OFFICERS' UNIFORMS

Made from the Finest Imported Khaki Materials, including

KEEN CONTEST FOR WICKSTEED

(Continued from page 1.)

ver exhibition on the various pieces of apparatus.

The judges, Dr. F. W. Harvey, Dr. J. J. Ross and Dr. G. A. Smith, had a very difficult problem in choosing winners in the junior and first year competitions as the following figures will show:

The special requirement that every candidate be able to swim 50 yards was a good one, although it prevented two competitors from going on with the contest. This test showed that one of the winners and another who ranked very high did not possess the same ability in the water as on the gym floor, for they had great difficulty in covering the required distance. It is altogether likely that in future, points will be allotted for swimming, as in the other events of the competition.

The following are the points awarded to each of the competitors:

Wicksteed Silver Medal

B. A. Klein, Sc. '16:— Points
Parallels 64.1
Dance 56.6
Potato race 85.5
Horse 32.8
Low bar 33.1
Drill 74
Total 346.1

Wicksteed Bronze Medal

J. Aggiman, Sc. '17:— Points
Parallels 68.7
Dance 62
Potato race 81.5
Horse 33
Low bar 36.5
Drill 74.3
Total 365

W. S. Gould, Sc. '17:— Points
Parallels 53.1
Dance 65.3
Potato race 89.5
Horse 30.3
Low bar 29.3
Drill 68
Total 335.5

M. W. Henderson, Med. '19:— Points
Parallels 47.5
Dance 62.6
Potato race 84
Horse 25.3
Low bar 24.5
Drill 68
Total 311.9

E. D. McGreer, Arts '18:— Points
